What's New in the CloudMe?

CloudMe is a backup and synchronization software that allows you to backup your pictures, audio and videos, spreadsheets, presentations and many other types of files to the cloud, so that they can be easily accessed from multiple devices. When it comes to free cloud apps, I'd rather mention SyncThing, as it's one of the apps that can bring your files to a single online account using either "push" or "pull" options. When building a new home or replacing an old one, you'll want to ensure that it meets all the standard requirements in your community. You'll also want to ensure that it meets the maximum code requirements in your county. While these are basic necessities for any new home, you'll want to double check the facts. For example, there are five (5) basic residential requirements that are designed to protect your home, its occupants, and the home's surroundings. 5 Basic Requirements for New Construction 1. Locate your home away from known underground utilities 2. Back up at least 200 feet away from wells and septic systems 3. Properly enclose at least the foundation from precipitation 4. Remove snowmelt and roof runoff 5. Protect groundwater from development If you want to learn more about the basic requirements, continue reading. This information comes from the latest issue of the Construction Resource Directory (CRD), a quarterly publication of the National Association of Home Builders. Q: Is it possible to get from "type of value"? I have a function which gets a type. It can be example a string. Then I can create a new instance of type MyClass with a constructor that contains a string. It's something like this: function createClass(type: T) { return new MyClass(type); } var myClass = createClass("MyClass"); I want to add type to constructor that already exists. However I'm not able to. Is it possible to say something like this? function createClass(type: T) { return (MyClass as any).constructor(type); } I really don't know how to say what I want to say. Anyway I get this error: Property 'constructor' does not exist on type 'typeof MyClass' Thank you. A:
