Do you want to add Office 365 to your Windows PC, Laptop or Mac and Office 2016 license to new or existing Microsoft Office Documents and Presentations? Now, it is possible by KMS. So, this is a very important and powerful tool. KMS is an office product for Windows, but now it is supporting Office 365. You can count on it because KMS can give you the advantage of KMS to solve any kind of problem. Read on to know how this KMS can do this. You should note that, in case of Office 365, this tool is not supported and you should use any other tool instead. KMS will set up all the Office 365 services in the back end. It is not a wizard. Also, KMS is not an office suite. It is the product of BlackBone Software. Its name is OfficeSuite Professional. You just need to install and that is it. So, if you want to add KMS to your Windows PC, Laptop, or Mac, and you want to add Office 365 to your Microsoft Office Documents and Presentations, you can use the Office Suite Professional KMS by BlackBone Software. You can find this software from the end of this article. OfficeSuite Professional is the ideal way to automate your Office through Plug-ins. The simplest way to access KMS is that you can create a batch file with the commands and run it directly. Or, you can create a shortcut and run it directly. Now, if you have bought the Office 365 and KMS is not available for Office 365 then you have a good number of options. You can try the third-party Office365 Connect or you can use the AbileneCloud app, which will give you the same benefits that you are getting. 5ec8ef588b
