
Xampp Control Panel V3.0.12 !!LINK!! Free 49!

1797 matches - I have the same problem. Just installed the latest version of XAMPP. from the control panel I can run Apache and Filezilla but not MySQL. I followed ./configure.sh -p2 where is the option I think MySQL needs. When I installed MySQL from MySQL-4.3.11-0ubuntu0.14.04.tar.gz I ran make.make. make does a lot of things including make install but I'm not sure where MySQL should go. When I run /home/myuser/MySQL/phpmyadmin I get the error "could not connect to localhost". I don't think it has anything to do with XAMPP, because on another occasion when I installed Apache I was able to connect to it (and to MySQL).

Xampp Control Panel V3.0.12 Free 491
